[3] Mode -

Mode of a Statistical data is the variate whose frequency of occurrence is the most. Thus mode of a Statistical data is the one value with highest frequency

Example 3 ->

Q. Find Mode of the following data : 3, 5, 1, 2, 4, 6, 0, 2, 2, 2, 3

Ans. In this data 2 is repeated more than any other number

∴ Mode is 2

Example 4 ->

Q. Find Mode -

No. of goals	0	1	2	3	4	5
Nb. of matches	2	4	7	6	8	3

Mode is 4 as the variate has maximum frequency of 8
