

TABLETATION

It is a process of summarizing classified data in a tabular form for the sake of ease of understanding & the investigator is able to find the information easily.

Table is a systematic arrangement with rows & columns. It facilitates comparison & often reveals a pattern.

E.g.

Vaccination Status	Number	Percentage
Not Vaccinated	75	35.7
Partially Vaccination	57	27.1
Fully Vaccinated	78	37.2
<u>Total</u>	210	100.00
